

Jim,

You can use the below as testimonial.

My wife and I decided on Gerold Brothers Builders after interviewing and researching over 10 builders. Jim's homes stood out from amongst the others by possessing quality, and design that the others didn't even come close in comparison. He is a builder whose pride and attention to detail is evident in all that he does. His ability to explain many of the construction issues which came up in "laymen" terms enabled my wife and I to make certain decisions in an educated and informed manner. There's a lot to be said about a builder who 2 years after the completion of our home will still come over with just a phone call. For those of you who are looking for a builder you can trust, and truly takes pride in what he does, Jim Gerold is the man. To quote the old cliché, "they don't make them like this anymore" is truly an understatement when it comes to Jim Gerold.

Thank You,

Steve Patsis
